

# PRIVACY POLICY

This privacy policy governs your use of the software application SatCatcher for mobile devices that was created by InfoSofty. The Application is a satellite finder that help you to install and orient your dish

## **What information does the Application obtain and how is it used?**

### **User Provided Information**

The Application doesn't need any personal information.

The application requires only camera, GPS and sensor data information :

- Camera access is needed to show the satellite position in the augmented reality
- Compass access is needed to determine the satellite direction
- Location access is needed to calculate satellite orientation and show it in a map
- Gyroscope access is needed to follow the satellite position in the augmented reality

### **Automatically Collected Information**

The application uses Google Mobile Ads only in the Free version of SatCatcher.

The Google Mobile Ads SDK collects and shares the following data types *automatically* for advertising, analytics, and fraud prevention purposes:

- IP address: Collects device's IP address, which may be used to estimate the general location of a device.
- User product interactions: Collects user product interactions and interaction information, including app launch, taps, and video views.
- Diagnostic information: Collects information related to the performance of your app and the SDK, including crash logs, app launch time, hang rate, and energy usage.
- Device and Account identifiers: Collects Android advertising (ad) ID, app set ID, and, if applicable, other identifiers related to signed-in accounts on the device. AdMob uses the device's advertising ID to serve personalized ads based on the user's interests.

## **Data handling**

Android ad ID collection is optional. The ad ID can be reset or deleted by users using ad ID controls in the settings menu.

If you disable the use of the device advertising id, You will receive a random no personalized ads.

## **Contact us**
